

# Weekly Project Status Report

## IT Career Launch Campaign

*Generated: Sunday, November 16, 2025 at 12:24 PM*

### Basic Information

<b>Reporting Period:</b>	Week 13: Nov 11- 16, 2025
<b>Project Name:</b>	IT Career Launch Campaign
<b>Project Goal:</b>	To build a professional IT portfolio showcasing skills, certifications, and applied projects while completing real job applications to secure at least one interview. The final goal is to demonstrate professional readiness through a reflection and final showcase presentation.
<b>Project Manager:</b>	Samuel Avila Varela

### Project Health

#### AT RISK

**Executive Summary:** This week I completed the final Coursera module for my cybersecurity certification and updated Deliverable 5 tasks and dates in Asana. I made progress reviewing job and internship options but have not yet submitted applications, which places Deliverable 5 slightly at risk. With application submissions planned for this week, the project can still return to green and remain on track.

### Accomplishments This Week

1. ✓ Completed the final Coursera cybersecurity module.
2. ✓ Updated Deliverable 5's structure and subtasks in Asana, including new due dates.
3. ✓ Researched IT job and internship listings to prepare for the application phase.

### Plan for Next Week

1. → Submit 5–10 IT job or internship applications, based on professor feedback
2. → Add certification proof to the portfolio site (Coursera module completion)

3. → Begin early prep for interviews: create a simple practice question list or checklist

## Upcoming Milestones

Milestone	Target Date	Status
Deliverable 5 – Professional Visibility & Applications	11/17/2025	DELAYED
Deliverable 6 – Launch & Interview Execution	12/1/2025	AT RISK
Final Showcase Presentation	12/8/2025	ON TRACK

## Issues & Risks / Mitigations

**Delay in beginning job application submissions; professor emphasized the need for ~10 applications or networking.** MEDIUM

**Mitigation:** Schedule two focused sessions next week to submit 5–10 applications and reach out to at least one classmate/peer for networking support.

## Changes Since Last Report

**Change #1:**

**Date:** 2025-11-12

**Description:** Refreshed the timeline for Deliverables 5 and 6 and adjusted subtasks based on professor feedback and current progress.

**Reason / Impact if not made:** Ensures the project schedule reflects realistic workload and aligns with the requirement to submit multiple applications to secure an interview.
